Core Java- Basics Quiz-2

Which is NOT a section of all types of loops ?

A.   **Initialization**

B.   **Loop Body**

C.   **Test statement**

D.   **The word "while"**

Answer: D

In a "for" loop, what section of the loop is not included in the parentheses after "for" ?

A.   **Initialization**

B.   **Loop Body**

C.   **Test statement**

D.   **Update**

Answer: B

Following code will result in: int a1 = 5; double a2 = (float)a1;

A.   **Compilation error**

B.   **Runtime error**

C.   **No errors**

D.   **Runtime Exception**

Answer: C

Java runs on _____.

A.   Windows

B.   Unix/Linux

C.   Mac

D.   All of the above

Answer: D

What is the size of a Char in Java?

A.   4 bits

B.   7 bits

C.   8 bits

D.   16 bits

Answer: D

A null reference may be used to access a static variable or method.

A.   True

B.   False

Answer: A

Local Primitive data types are allocated on a stack.

A.   True

B.   False

Answer: A

What is a loop ?

A.   A new type of Applet.

B.   A segment of code to be run a specified amount of times

C.   A segment of code to be run infinite times

D.   A segment of code to be run once

Answer: B

Can you compare a boolean to an integer?

A.   Yes

B.   No

Answer: B

Which one is not correct?

A.   A class needs to be instantiated as an object before being used

B.   An objects exists in memory in run time

C.   Class and object are just different names for the same thing

D.   An object is a variable, where its type is the class used to declare the variable

Answer: C

Following code will result in: int num = 6.7;

A.   Compilation error

B.   Runtime error

C.   num being 6.7

D.   num being 6

Answer: A

What is essential in making sure that your loop is not infinite ?

A.   That your Boolean statement will at some point be false

B.   That there is a Boolean statement somewhere in your code

C.   That your Boolean statement will at some point be true

D.   All of the choices

Answer: D

What displays from the following statements? String word = "abcde"; for (int i = 0; i <4; i+=2) System.out.print(word[i]);

A.   ab

B.   ac

C.   ace

D.   bd

Answer: B

Is Empty .java file name a valid source file name?

A.Yes

B.No

Answer: A

What is the default value of the local variables?

A. null

B. 0

C. depends on the data type

D. no default value for local variables

Answer : D
